Westminster

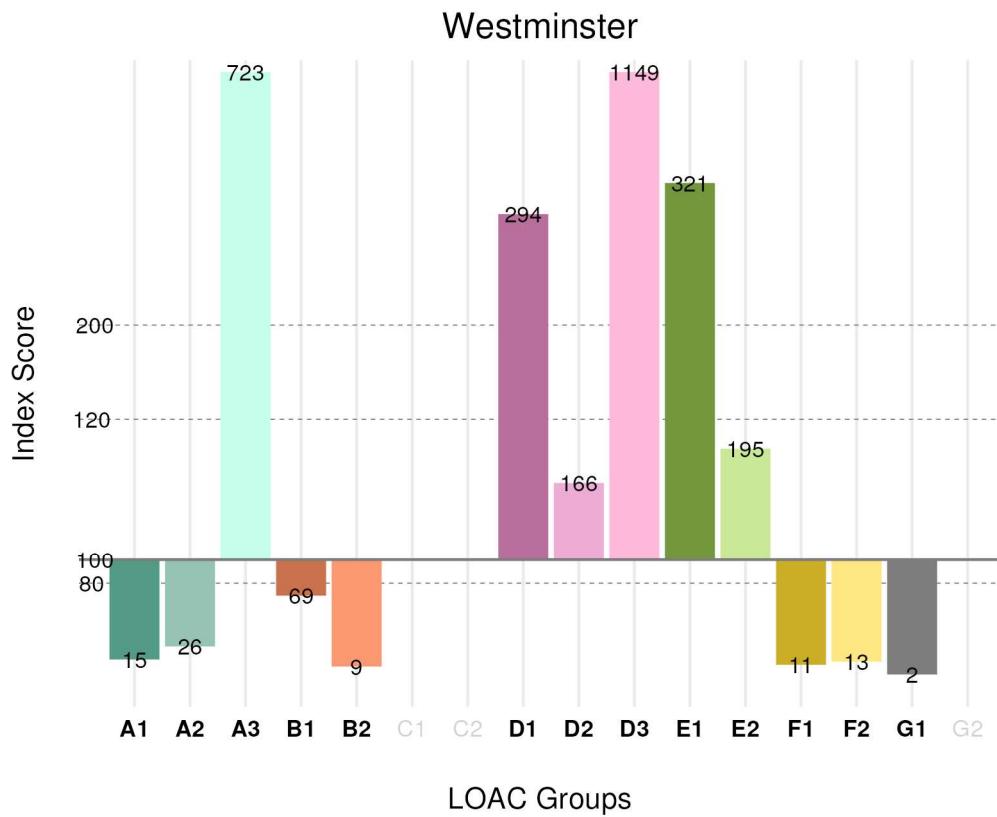

Spatial Distribution

The following map shows the spatial distribution of LOAC Groups across the London borough of Westminster.

Index Scores

The distribution of LOAC Groups within Westminster relative to the London average can be shown by calculating an index score. If a distribution was the same as the London average the score would be 100. A score of 200 represents double the London average, and 50 a half. Scores that are less than 80 and greater than 120 are typically indicators of an interesting pattern to interpret, and are the thresholds used to describe the LOAC Super Groups and Groups. Where LOAC Groups are not present within a borough, the LOAC Group codes are 'greyed out'.

Population Counts

The distribution of the population by LOAC Groups is shown in the following table.

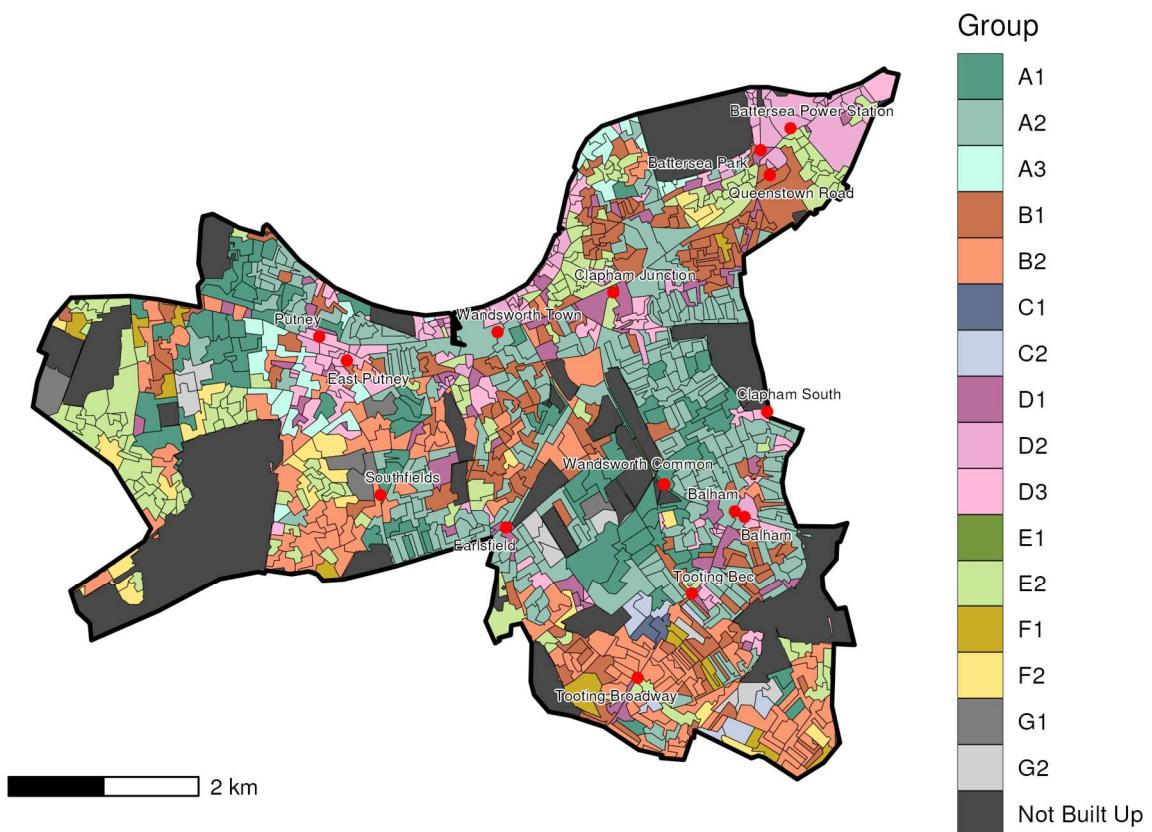

Group	Total Population (Census 2021)
A1	1,194
A2	1,992
A3	25,925
B1	12,335
B2	1,481
C1	0
C2	0
D1	24,215
D2	6,213
D3	58,292
E1	23,951
E2	43,197

Group	Total Population (Census 2021)
F1	1,922
F2	3,137
G1	353
G2	0

Wandsworth

Spatial Distribution

The following map shows the spatial distribution of LOAC Groups across the London borough of Wandsworth.

Index Scores

The distribution of LOAC Groups within Wandsworth relative to the London average can be shown by calculating an index score. If a distribution was the same as the London average the score would be 100. A score of 200 represents double the London average, and 50 a half. Scores that are less than 80 and greater than 120 are typically indicators of an interesting pattern to interpret, and are the thresholds used to describe the LOAC Super Groups and Groups. Where LOAC Groups are not present within a borough, the LOAC Group codes are 'greyed out'.

Population Counts

The distribution of the population by LOAC Groups is shown in the following table.

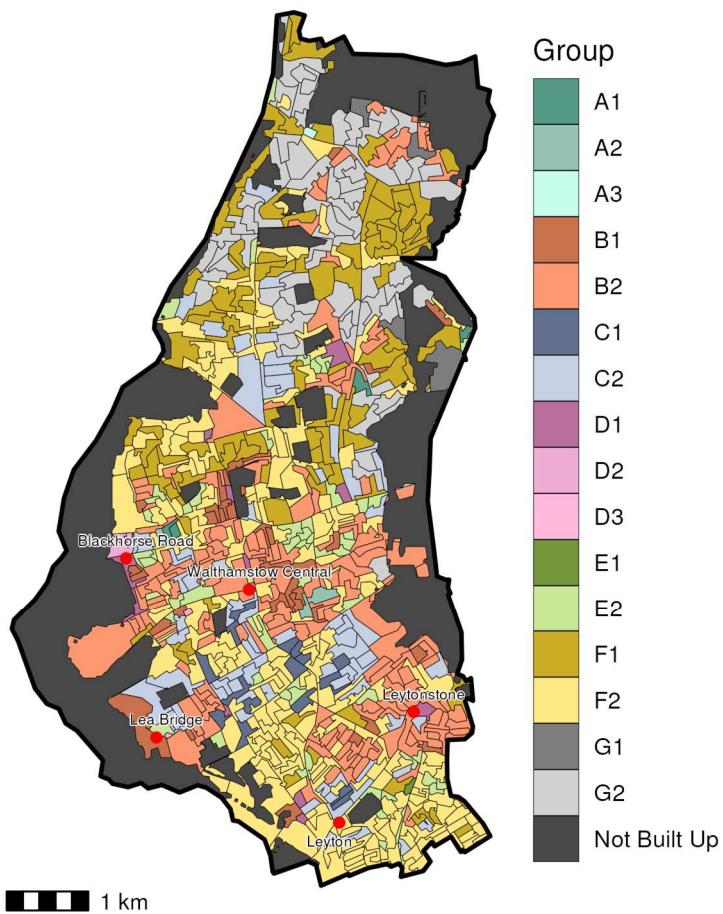

Group	Total Population (Census 2021)
A1	26,230
A2	80,596
A3	6,913
B1	42,206
B2	45,031
C1	895
C2	3,091
D1	17,679
D2	13,470
D3	22,087
E1	174
E2	49,889

Group	Total Population (Census 2021)
F1	4,911
F2	8,506
G1	1,914
G2	3,840

Waltham Forest

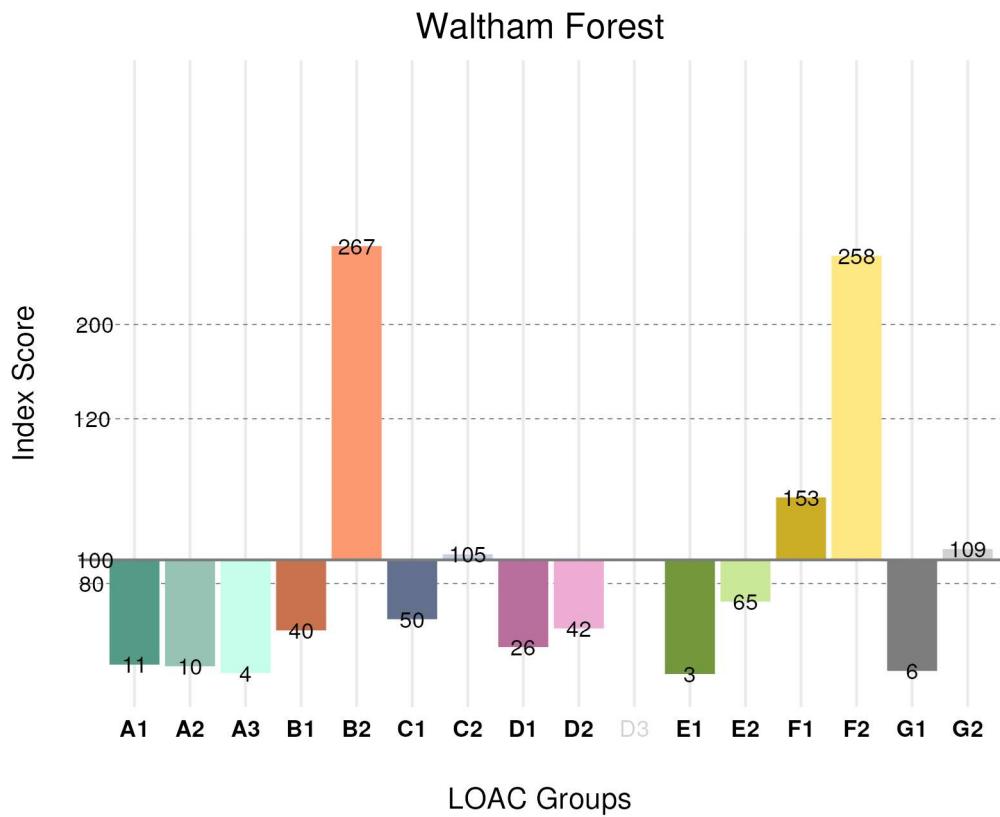

Spatial Distribution

The following map shows the spatial distribution of LOAC Groups across the London borough of Waltham Forest.

Index Scores

The distribution of LOAC Groups within Waltham Forest relative to the London average can be shown by calculating an index score. If a distribution was the same as the London average the score would be 100. A score of 200 represents double the London average, and 50 a half. Scores that are less than 80 and greater than 120 are typically indicators of an interesting pattern to interpret, and are the thresholds used to describe the LOAC Super Groups and Groups. Where LOAC Groups are not present within a borough, the LOAC Group codes are 'greyed out'.

Population Counts

The distribution of the population by LOAC Groups is shown in the following table.

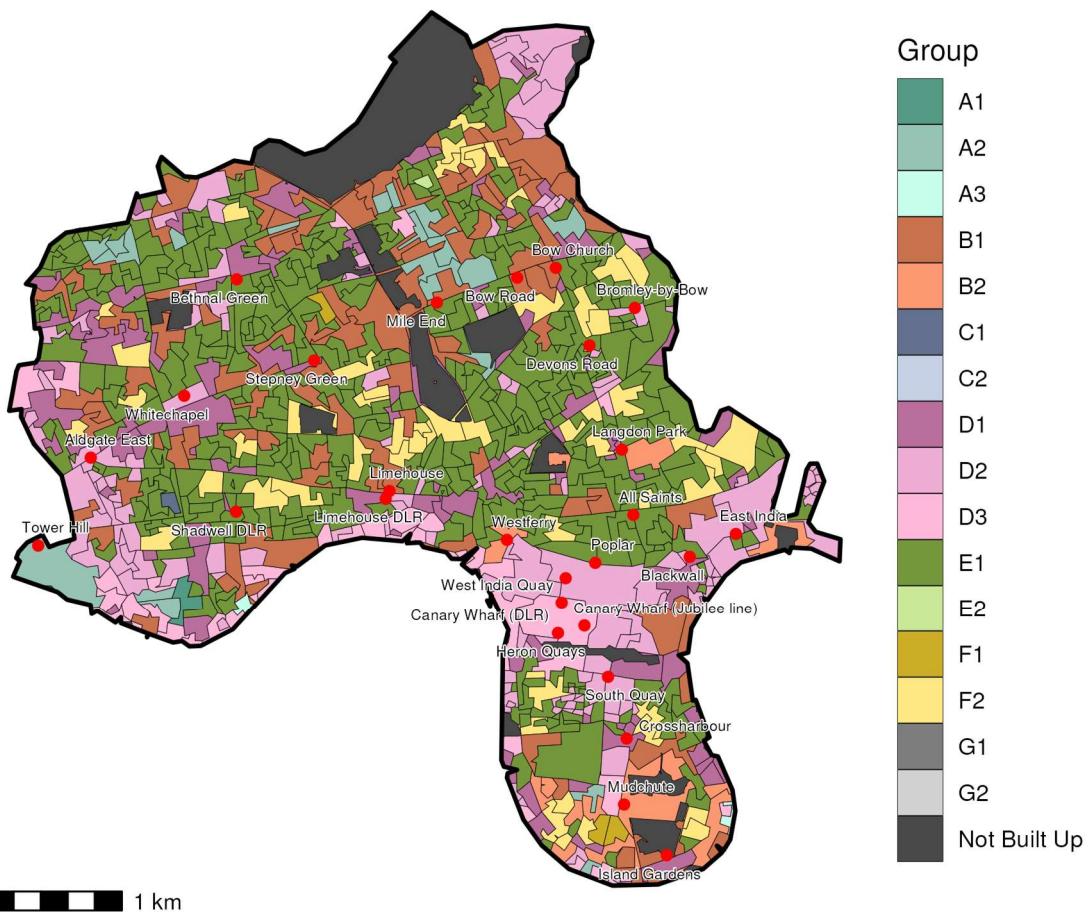

Group	Total Population (Census 2021)
A1	1,179
A2	995
A3	188
B1	9,723
B2	58,477
C1	8,043
C2	28,769
D1	2,906
D2	2,132
D3	0
E1	306
E2	19,513

Group	Total Population (Census 2021)
F1	37,511
F2	82,870

Tower Hamlets

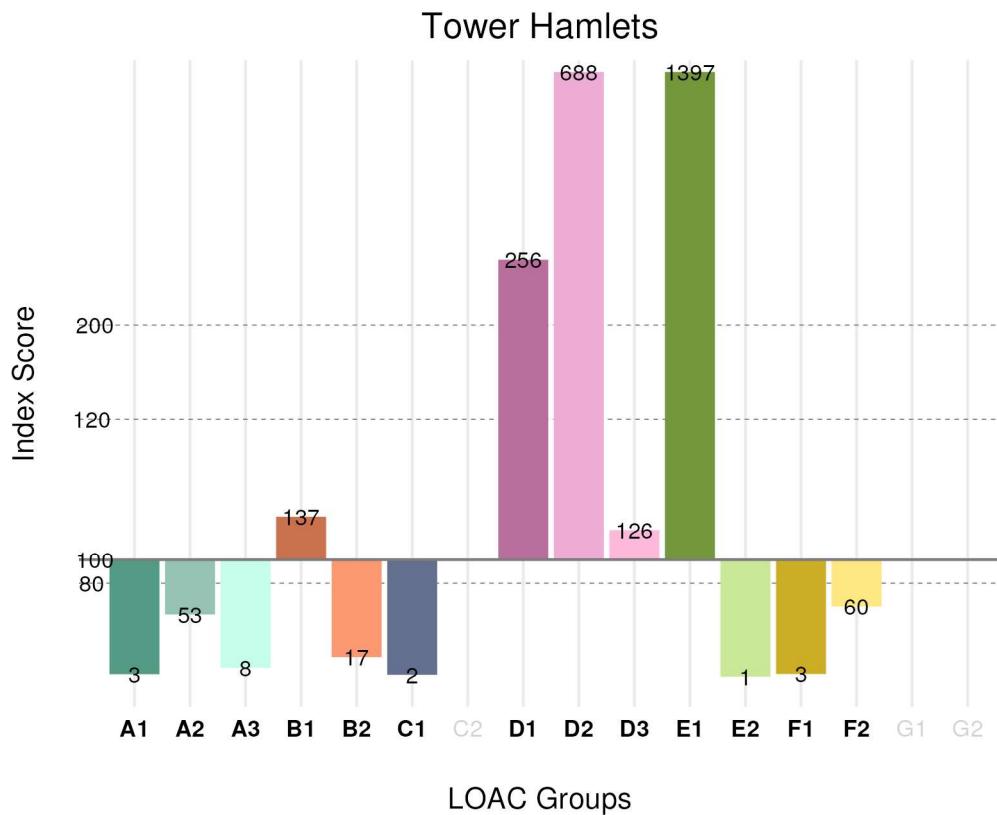

Spatial Distribution

The following map shows the spatial distribution of LOAC Groups across the London borough of Tower Hamlets.

Index Scores

The distribution of LOAC Groups within Tower Hamlets relative to the London average can be shown by calculating an index score. If a distribution was the same as the London average the score would be 100. A score of 200 represents double the London average, and 50 a half. Scores that are less than 80 and greater than 120 are typically indicators of an interesting pattern to interpret, and are the thresholds used to describe the LOAC Super Groups and Groups. Where LOAC Groups are not present within a borough, the LOAC Group codes are 'greyed out'.

Population Counts

The distribution of the population by LOAC Groups is shown in the following table.

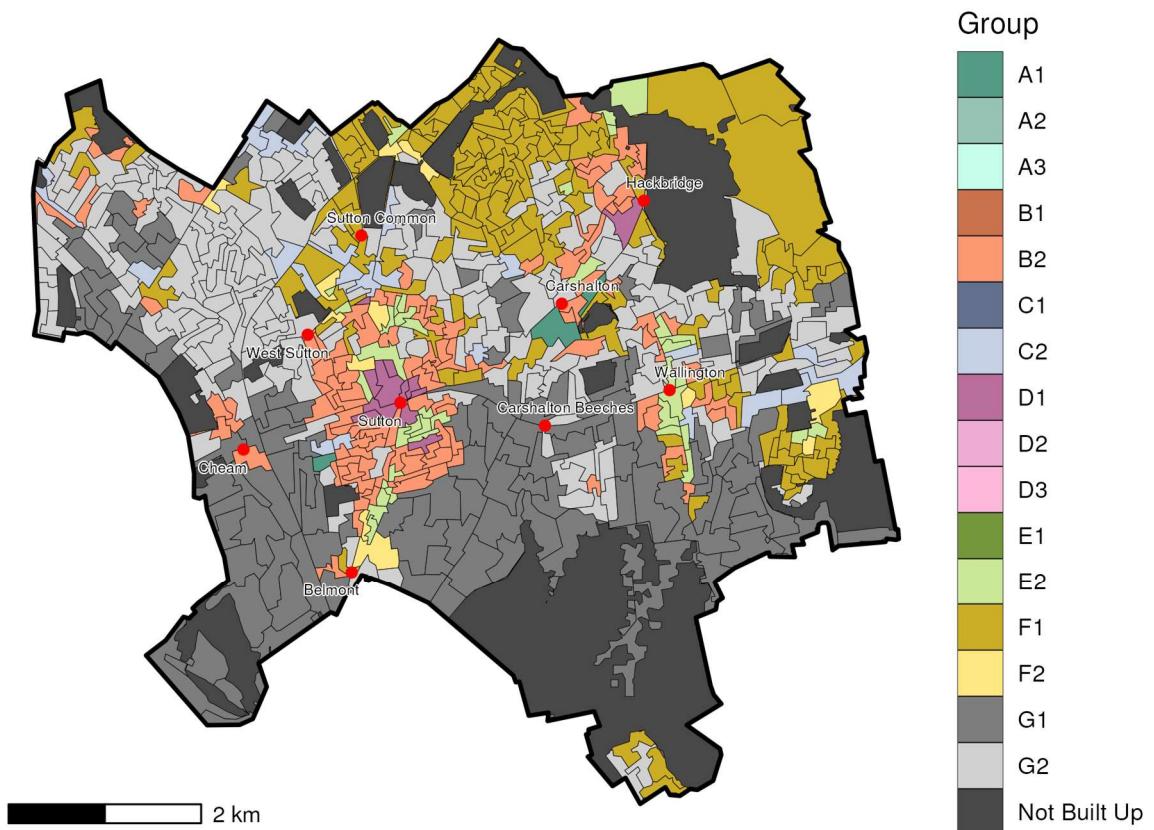

Group	Total Population (Census 2021)
A1	319
A2	6,156
A3	442
B1	37,064
B2	4,194

Sutton

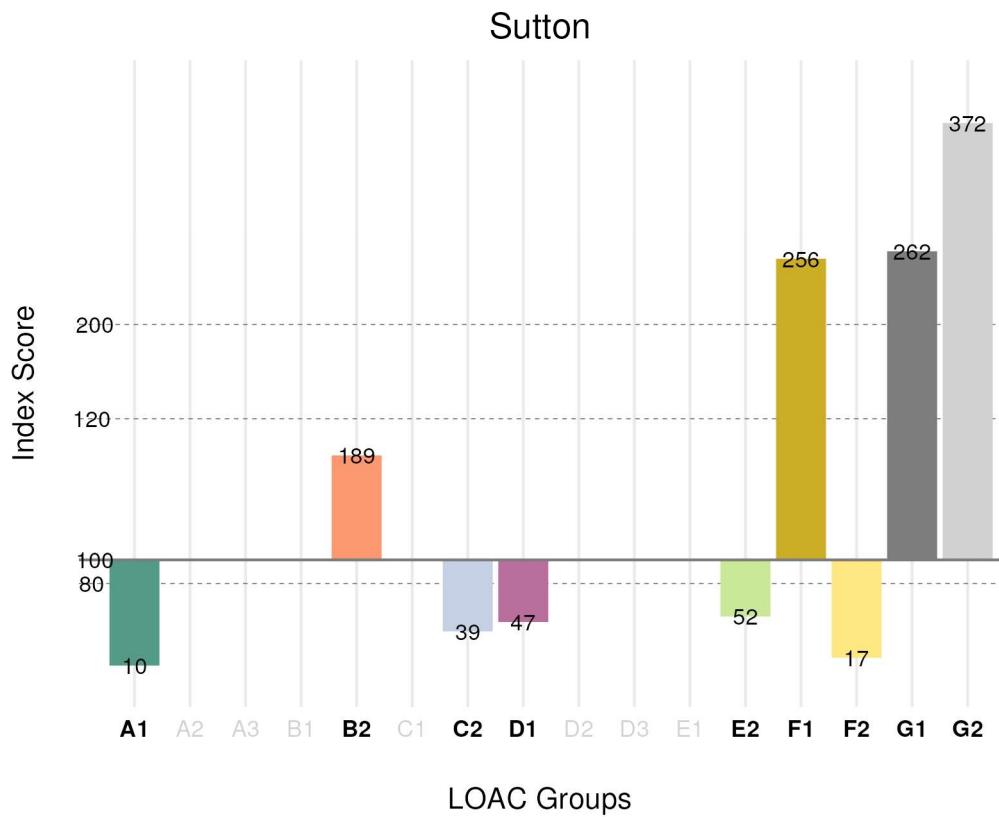

Spatial Distribution

The following map shows the spatial distribution of LOAC Groups across the London borough of Sutton.

Index Scores

The distribution of LOAC Groups within Sutton relative to the London average can be shown by calculating an index score. If a distribution was the same as the London average the score would be 100. A score of 200 represents double the London average, and 50 a half. Scores that are less than 80 and greater than 120 are typically indicators of an interesting pattern to interpret, and are the thresholds used to describe the LOAC Super Groups and Groups. Where LOAC Groups are not present within a borough, the LOAC Group codes are 'greyed out'.

Population Counts

The distribution of the population by LOAC Groups is shown in the following table.

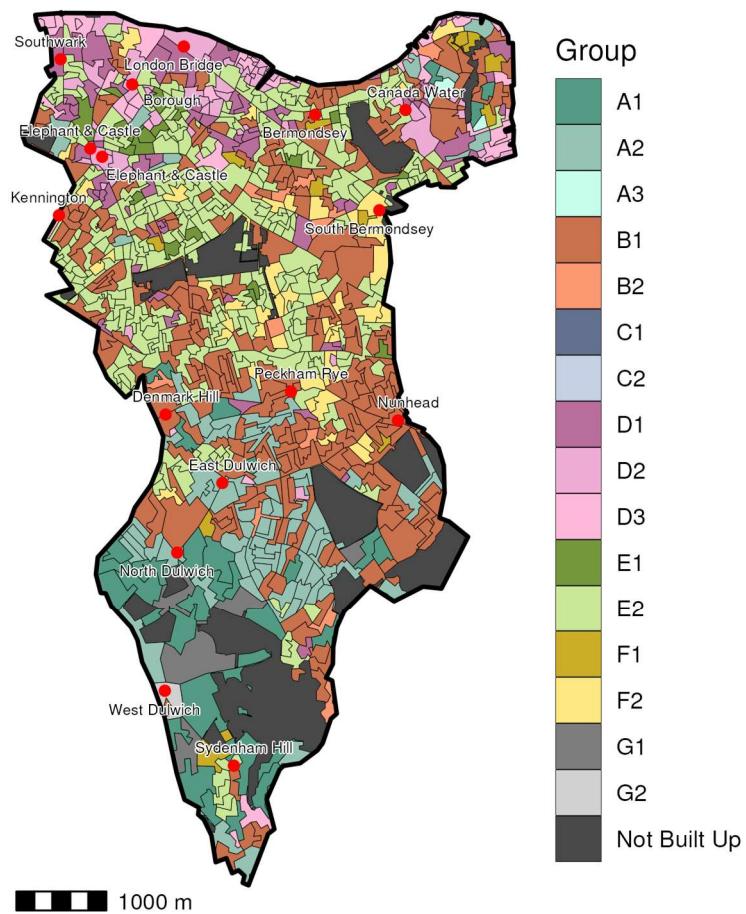

Group	Total Population (Census 2021)
A1	824
A2	0
A3	0

Greenwich

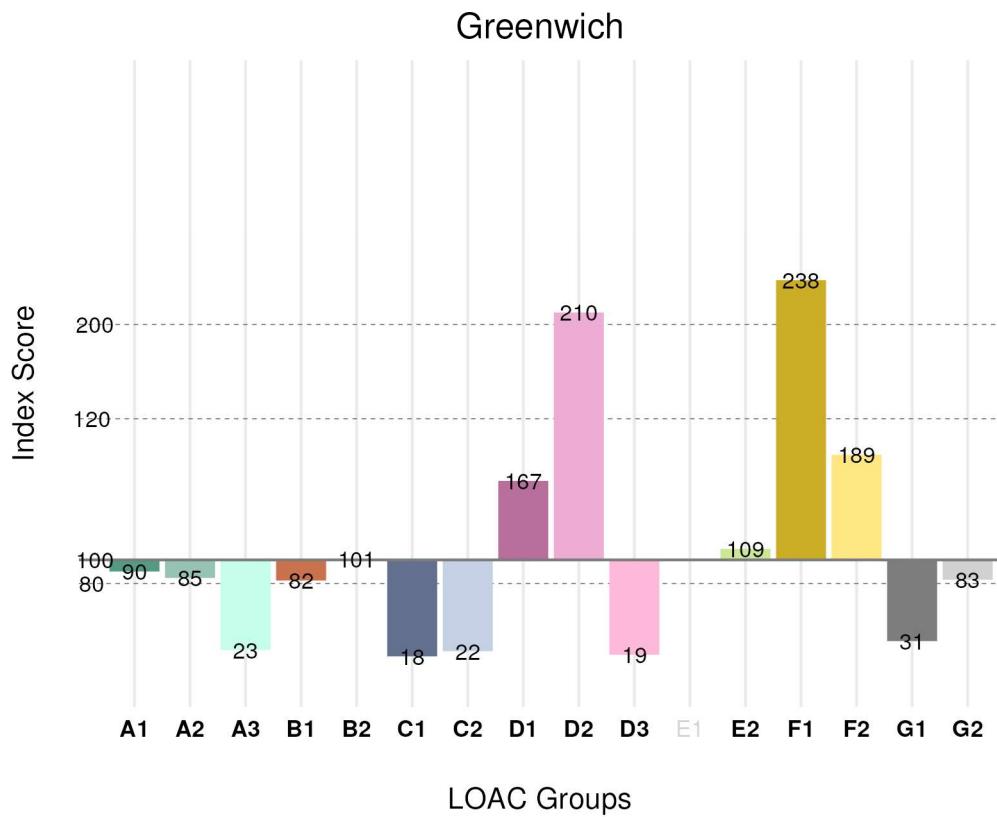

Spatial Distribution

The following map shows the spatial distribution of LOAC Groups across the London borough of Greenwich.

Index Scores

The distribution of LOAC Groups within Greenwich relative to the London average can be shown by calculating an index score. If a distribution was the same as the London average the score would be 100. A score of 200 represents double the London average, and 50 a half. Scores that are less than 80 and greater than 120 are typically indicators of an interesting pattern to interpret, and are the thresholds used to describe the LOAC Super Groups and Groups. Where LOAC Groups are not present within a borough, the LOAC Group codes are 'greyed out'.

Population Counts

The distribution of the population by LOAC Groups is shown in the following table.

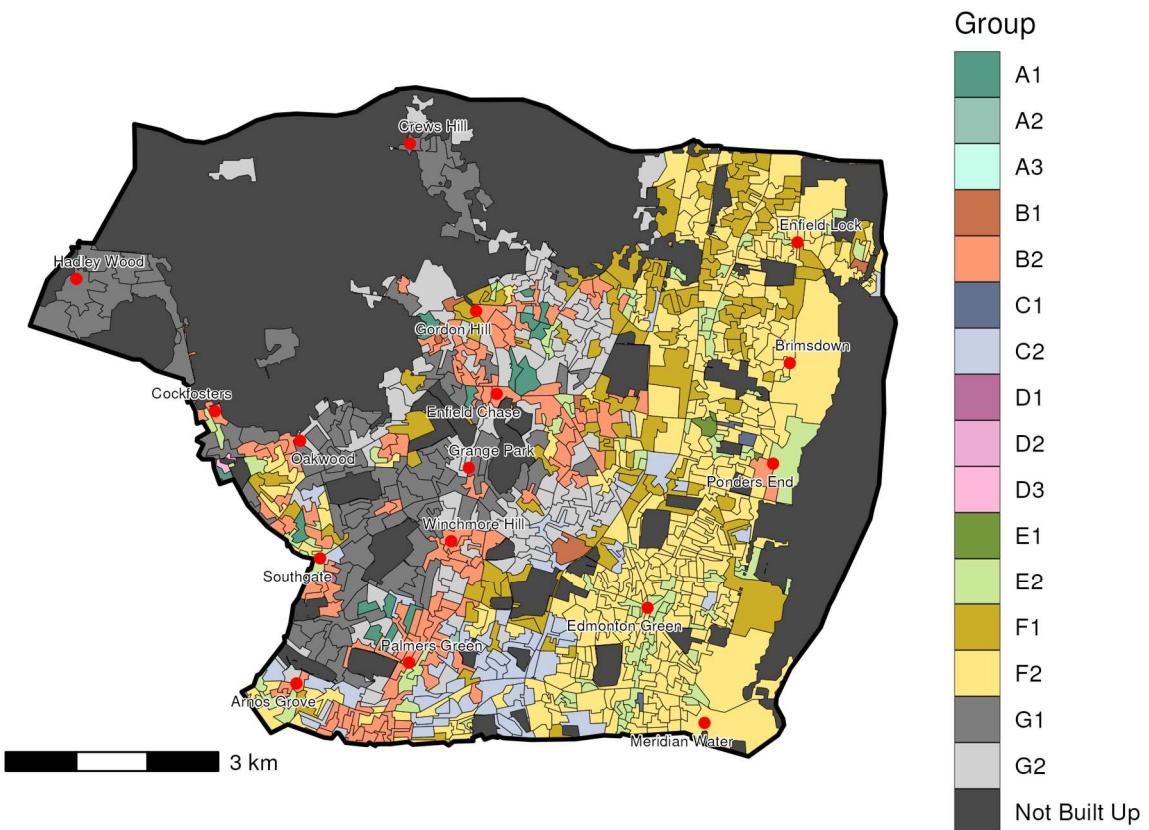

Group	Total Population (Census 2021)
A1	10,046
A2	9,094
A3	1,186
B1	20,763
B2	22,907
C1	3,036
C2	6,382
D1	19,476
D2	11,151
D3	1,392
